Let Mead O'Brien help you create a sustainable Steam Trap Management Process!

- Trained Survey Technicians
- Traps located and identified, tagged with SS tag #, and data logged with up to 27 fields of useful data per trap
- Executive summary, Failed trap report with steam & dollar losses, detailed Log sheets, and Recommendations are all provided in a professional report.
- Monitoring options presented for critical service applications
- Steam flow measurement design
- Heat recovery potential
- Training options in a live steam lab

Realize the Savings Now!

- ⇒ Reduce steam & condensate losses
- ⇒ Reduce loss of boiler chemicals
- ⇒ Improve heat transfer performance
- ⇒ Prevent coil and heat exchanger damage
- ⇒ Minimize water hammer hazards
